

# How to create flash gallery slide show and embed in php

How to embed photo flash gallery slide shows in your php website? You need to create a picture gallery and get the simple script code that for inserting in php website page at first. To create your dynamic slideshows, you also need to get a picture gallery generator.

[Flash slideshow maker](#) is a **php slide show generator**, which allows you to create flash gallery slideshows and get the simple slide show scrip code. After you get the code, you can insert it in your php website.

## How to make dynamic php flash photo gallery slideshows?

Before you create your dynamic image slide shows, you also need to free [download the slideshow generator software](#) and install it on your computer at first.

Now, let's follow the simple steps below to make your dynamic flash slides using the generator.

- 1. Open the image slideshow generator and click the "Add" button to add your pictures in to the creator.
- 2. Set the slide show playing order. You can use your mouse to set the images playing order via the "dragging" behavior.
- 3. Set dynamic transition effects for your slideshow. On the "Transition Effect" tab of the generator, you can set the dynamic transition effects for your picture slide show.
- 4. Decorate picture. Double click one of images and it will pop up "Edit Photo" window, where you can decorate the photo.

- 6. Choose a flash template for slideshows. You can choose a "Basic" or "Advanced" for slides in the theme window. The generator also allows you to add background music in to the slide shows. If you want, you can also import your favorite music in to slides from a CD disc.(If you choose the "Basic" template, you will get a simple SWF file.)
- 7. Publish your picture gallery slide shows. To embed the slides in your php website, you need to upload the slides to Skyalbum.com to get the script code. On the "Publish" window, you need to choose "Create Flash files and Upload to Skyalbum.com".

### How to get the slide show script code for php website?

Embed:

SWF URL:

**Post Myspace**

Share Your Content With Millions of MySpace Users

Step 1: Copy the code below relevant to your HTML implementation

```
<object width="800"
height="600"><param
name="movie"
value="http://www2.skyalbum.com/album2/2009/200910/20091016/socubeliveg/4b2aa6df3b0/christmas_decoration.swf?fs_path=http://www2.skyalbum.com/album2/2009/200910/20091016/socubeliveg/4b2aa6df3b0"></param><param name="wmode"
```
