How to burn and convert the youtube videos to DVD movie to watch on HD TV

To play YouTube movies on television, you also need a DVD converter to convert and burn them to a DVD disc at first. [DVD Slideshow converter](#) is a Converter that allows you to convert the videos from your desktop, notebook, laptop to the HD DVD movie for playing on TV.

The following tutorial will teach you how to convert and burn the youtube videos to a HD DVD disc. But you also need to free **download the slide show converter** and install on your pc like desktop, laptop, or notebook at first.

Part 1. import videos

Open the Converter and click "Organize" menu on top window to choose "Add Video Clips" to import the YouTube video clips you download on your notebook, desktop or laptop. (**Note:**The converter can just allow you to add **AVI** video clip directly. If you want to add more formats videos, you will need to download and install a free plugin called FFDSHOW.(<http://sourceforge.net/projects/ffdshow/>)

Part 2. Choose a theme menu

After you add the movies to the converter, you may preview them on the "Album Pre view" tab. To navigate how to play video on TV screen, you also need to choose a beautiful menu on the "Choose Menus" window of the Converter.

Part 3. Convert and burn these movies to a DVD disc

Go to the "Burn Disc" window to choose "DVD video Disc" as slideshow output format and input a DVD disc. When all is ready, you will press the "Burn Now!" button to burn and convert the movie clips slideshow to the DVD disc. In a few minutes, your movies will be saved onto the disc.

Part 4. How to play and watch your YouTube videos on television

When the burning is completely, you will get a slideshow DVD that saves your YouTube movies. Then, you may play the disc on your notebook, laptop or desktop to have a pre view at first. If you think the slide show disc is ok, you will play it on your HD TV to watch or see your YouTube movie.
